MICHIGAN ADVANCED TECHNICIAN TRAINING (MAT²)

THE NEW AND INNOVATIVE APPROACH POST-SECONDARY EDUCATION.

MAT² combines the needs of students and industry partners. It creates a dual-education system to produce a pipeline of educated and highly-qualified employees for today's job market openings.

High-demand and high-paying manufacturing and technology jobs are going unfilled because of a shortage of workers with the necessary skills to fill them. MAT² is a chance for students to receive the necessary training and experience to compete for these job opportunities.

MAT² will provide students with:

- College tuition paid for by the employer
- On-the-job training with pay*
- An advanced Associate's degree in a high-tech, in-demand field
- A guaranteed job upon successful completion of the program

MAT² will provide employers with:

- Highly skilled and capable, young workforce
- The unique opportunity to define educational content and train in-house
- A well-developed system, with the option to add and develop new programs and professions.

* In exchange, MAT² graduates commit to remaining on the job for at least two years after the training period ends

Gain real-world skills while obtaining a degree

MAT² combines state-of-the-art training facilities with actual work sites to provide a skills-based education. Students alternate between the classroom and learning lab, acquiring marketable skills and valuable knowledge.

Accepted MAT² students earn while they learn, using their new skills on the job at a participating company. The employer pays ALL tuition fees.

The program is offered at community colleges in Southeast Michigan that have the equipment and facilities necessary for training. The participating companies are highly versed in the training content to ensure the curriculum will fully prepare students for a successful career.

Turn a dream into reality today. Call **1.888.522.0103** or email us at MAT2@michigan.org to find out if MAT² is for you. To learn more, visit mitalent.org/mat2. Applications for MAT² are ongoing and students may apply online at any time.

Gain the high tech skills
you need to succeed

“ MAT²'s graduates will meet global standards and represent a new generation of talent for Michigan companies ”

Governor Rick Snyder
MAT² Opening Ceremony
